## AN INTERVIEW WITH STEPH FROM KEITS

JUNE 2022

As KEITS celebrate our 25th year of business, we are looking back fondly on old memories.

Steph started her career at KEITS as an apprentice, something we obviously feel very passionate about!

Let's hear a little bit about Steph's journey with KEITS..

### *How did you start working for KEITS?*

Youth Connections were helping me look for a job as I was really struggling to find work after I left school. I got a call from them one day saying that they had got me an interview with KEITS Training Services for an Apprenticeship. I went to my interview not knowing much about what KEITS do, which I knew wasn't great, so I was not expecting the call to say that I had been successful! I also wasn't expecting to stay at the company for long either as I thought I would be the type of person who would be in and out of jobs all the time but here I am 12 years on!

### *What role are you currently in?*

I am currently a Data and Operations Supervisor and really proud of how far I have come.

### *What's the best thing about working for KEITS?*

The best thing about working for KEITS is how flexible the company is and it really is more of a family environment than a work one. The staff are passionate about what we offer and that makes a brilliant place to work!

### *What's been the biggest change at KEITS since starting?*

The biggest change for me personally is how we have all adapted so quickly through COVID to now be able to work from home. This is actually something I used to wish that KEITS could offer to all staff. We made everything electronic and it's actually improved our work load and also carbon footprint!

### *What's your best memory of your time with KEITS?*

Probably passing my apprenticeship, functional skills and getting my promotion! I also was awarded employee of the month and received amazing feedback from my managers. There have been lots of fun times.
